

The EHRS launched a new annual award in 2008 for **best basic research presentation** at an Annual EHRS Meeting in honor of **Prof. Jurgen Schweizer**.

Prof. Jurgen Schweizer has made an enormous contribution to our field with his singular work on human hair follicle-associated keratins. The award, called the '**Jorgen Schweizer Research Presentation Award**' is supported by an unrestricted educational grant from **L'Oreal 2008-2011**.

2008 Viljar Jaks: Lgr5 marks dynamic hair follicle stem cells
Prof. Jurgen Schweizer (right) congratulates Dr. Viljar Jaks

2009 Felix Brockschmidt: Genetics of Male Pattern Androgenetic Alopecia:
Androgen Receptor and Recent Findings on Chromosome 20p11

2010 Dr. Claire Higgins: Generation of induced pluripotent stem cells by reprogramming human dermal papilla cells

Dr. Gill Westgate (left) congratulates Dr. Claire Higgins

2011 Dr. Maria Kaspar: Wounding reprograms hair follicle stem cell progeny and promotes tumorigenesis

Dr. Bruno Bernard (right) congratulates Dr. Maria Kaspar

2012 Dr. Natalia V. Botchkareva: MicroRNA-214 controls skin and hair follicle development via modulating the activity of Wnt and BMP signaling pathways.

Dr. Andrew McDonagh (left) and Prof. Abraham Zlotogorski congratulate Dr. Natalia Botchkareva
